

FROM MOLECULE TO MEDICINE

An Introduction to Clinical Trials including ICH-GCP

22&23 April 2020

2-Day Course

Who should attend?

Newcomers to the industry, clinical research personnel with up to 2 years experience, those returning to “the sharp edge” of Clinical Operations, scientists working in related areas.

Course Objectives

This highly interactive course with a balance of information, workshops, exercises and quizzes offers a general overview of the drug development process. With this course you will:

- Understand how drugs are developed and learn in brief about the history and business side of drug development
- Find out what rules, guidelines and laws are essential, who the key players and what their responsibilities are
- Learn the top ethical principle and responsibility behind clinical research – protecting the patient
- Become knowledgeable about the safety aspects and how they are handled in clinical research
- Learn about clinical trial methodologies used and the key documents involved
- Know in detail about the activities necessary before the study can start
- Become familiar with the activities performed during and after the conduct of the clinical study

Course Topics

- The Drug Development Process
- Good Clinical Practice / ICH Guidelines / Directives
- “Who’s Who” in Clinical Research – Roles and Responsibilities
- Conducting Clinical Trials: pre-, during and post study activities
- Clinical Trial Methodology and Design
- Understanding and Handling of Adverse Events
- Monitoring Clinical Studies

Course Leader

Katia Pellaud Vann has a Master of Science in Neurobiology from the Swiss Federal Institute of Technology (ETH) in Zurich and has worked in the pharmaceutical industry for more than 20 years. She has extensive experience in Pharmaceutical Marketing and Pharma Research and Development. She has worked in Global Study Management and led several international clinical research studies.

Continuing Education

This course is accredited by the Swiss Association of Pharmaceutical Professionals (SwAPP) and the Swiss Society for Pharmaceutical Medicine (SGPM).
