

This training workshop will take place in a virtual format via a digital platform

Live virtual Instructor-led Training Course

FROM MOLECULE TO MEDICINE

An Introduction to Clinical Trials incl. ICH-GCP

Modules 1-4: **30th November / 1st / 2nd / 3rd December 2020**

Virtual Classroom

Who Should Attend?

Newcomers to the industry, clinical research personnel with up to 2 years' experience, those returning to "the sharp edge" of Clinical Operations, scientists working in related areas.

Course Objectives

This highly interactive course with a balance of information, workshops, exercises and quizzes offers a general overview of the drug development process. With this course you will:

- Understand how drugs are developed and learn in brief about the history and business side of drug development
- Find out what rules, guidelines and laws are essential, who the key players and what their responsibilities are
- Learn the top ethical principle and responsibility behind clinical research – protecting the patient
- Become knowledgeable about the safety aspects and how they are handled in clinical research
- Learn about clinical trial methodologies used and the key documents involved
- Know in detail about the activities necessary before the study can start
- Become familiar with the activities performed during and after the conduct of the clinical study

Course Modules

4 x half-day modules: 30th November / 1st / 2nd / 3rd December from 09:00 to 12:30 CET

- The Drug Development Process
- Good Clinical Practice / ICH Guidelines / Directives
- "Who's Who" in Clinical Research – Roles and Responsibilities
- Conducting Clinical Trials: pre-, during and post study activities
- Clinical Trial Methodology and Design
- Understanding and Handling of Adverse Events
- Monitoring Clinical Studies

Course Leader

Nelle Stocquart

With a master in Chemistry, Nelle Stocquart works since 2003 in the Clinical Research world. She was first an IVRS project manager for a Belgian CRO but then she wished gaining more experience on the field and became CRA for a top 5 international CRO where she got involved in many international phases II & III from early study stage till closure. She then evolved as project manager in pharmaceutical companies and CRO where she managed local and international studies from phase I to phase IV.

Nelle has a lot of experience in project management, team management and people coaching. Training, Coaching, Education and Continuous Professional Development have always been the common pillars in her educational path and professional career. She speaks fluently 3 languages, (French, Dutch and English).

Learning Methodology

The combination of live trainer interaction, information sharing and opportunities for conversations and discussions of the theory will help ensure you have a comprehensive understanding of the course content.

Technical Requirements

The training will be delivered via digital platform. In order get access you will need an internet connection, audio (from computer speakers or microphone), and a webcam (standalone or integrated with your monitor/laptop).

Continuing Education

This course is accredited by the Swiss Association of Pharmaceutical Professionals (SwAPP) and the Swiss Society for Pharmaceutical Medicine (SGPM).
