

***This training course will take place in a virtual format via a digital platform***

## **Live virtual Instructor-led Training Course**

### **FROM MOLECULE TO MEDICINE** An Introduction to Clinical Trials incl. ICH-GCP

Modules 1-4: **26<sup>th</sup> – 29<sup>th</sup> April 2021**

**Virtual Classroom**

#### **Overview**

This interactive course provides the perfect introduction to the different phases of drug development, clinical trials and complexity of these fields. The combination of trainer interaction, information sharing, exercises and quizzes guarantee a solid introductory understanding of the topic.

#### **Who Should Attend?**

Newcomers to the industry, clinical research personnel with up to 2 years' experience, those returning to "the sharp edge" of Clinical Operations, scientists working in related areas.

#### **Course Objectives**

- Understand how drugs are developed and learn in brief about the history and business side of drug development
- Find out what rules, guidelines and laws are essential, who the key players and what their responsibilities are
- Learn the top ethical principle and responsibility behind clinical research – protecting the patient
- Become knowledgeable about the safety aspects and how they are handled in clinical research
- Learn about clinical trial methodologies used and the key documents involved
- Know in detail about the activities necessary before the study can start
- Become familiar with the activities performed during and after the conduct of the clinical study

#### **Course Modules**

4 x half-day modules: 26<sup>th</sup> / 27<sup>th</sup> / 28<sup>th</sup> / 29<sup>th</sup> April from 09:00 to 12:30 CET

- The Drug Development Process
- Good Clinical Practice / ICH Guidelines / Directives
- "Who's Who" in Clinical Research – Roles and Responsibilities
- Understanding and Managing of Adverse Events
- Clinical Trial Methodology and Design
- Conducting Clinical Trials: pre-, during and post study activities
- Monitoring Clinical Studies

***This training course will take place in a virtual format via a digital platform***

### **Course Leader**

#### **Nelle Stocquart**

With a master in Chemistry, Nelle Stocquart works since 2003 in the Clinical Research world. She was first an IVRS project manager for a Belgian CRO but then she wished gaining more experience on the field and became CRA for a top 5 international CRO where she got involved in many international phases II & III from early study stage till closure. She then evolved as project manager in pharmaceutical companies and CRO where she managed local and international studies from phase I to phase IV.

Nelle has a lot of experience in project management, team management and people coaching. Training, Coaching, Education and Continuous Professional Development have always been the common pillars in her educational path and professional career. She speaks fluently 3 languages, (French, Dutch and English).

### **Learning Methodology**

The combination of live trainer interaction, information sharing and opportunities for conversations and discussions of the theory will help ensure you have a comprehensive understanding of the course content.

### **Technical Requirements**

The training will be delivered via digital platform. In order to get access you will need an internet connection, audio (from computer speakers or microphone), and a webcam (standalone or integrated with your monitor/laptop).

### **Continuing Education**

This course is accredited by the Swiss Association of Pharmaceutical Professionals (SwAPP) and the Swiss Society for Pharmaceutical Medicine (SGPM).
